

## WSD Bond Update - April 2016

Thank you for your interest in the progress of bond-funded projects in the Woodburn School District! Please read on to find out what's new.

### **Success High School**

The new building to house Success High School has undergone a lot of development in the last couple of months. In March, a lot of planning and coordination with the City of Woodburn's permitting department took place. This month, the conditional use permit was applied for. A schematic design was created so that estimating could occur and a timeline for completion was drafted too. Coming up, the design will be developed and floor plans will be completed. Building materials will be identified for the new building.

### **Washington Elementary**

Similar planning to Washington Elementary has been underway. Next up, we'll see further development on the design of the expansion that will provide additional classroom space, a gymnasium and media center, as well as upgrades to building HVAC, intercom and fire sprinkler systems.

*Washington Elementary staff review initial designs to provide input on whether instructional needs are being met in plans.*

### **Welcome Center building**

Renovations continue to the existing building that was purchased to convert to the Welcome Center and provide space for district offices. This month the new roof was installed. In the interior, the electrical was roughed in, HVAC installed and dry wall installation began. Next up will be the completion of these projects. There is also an expansion of the second story underway to provide more office and meeting space. The new Welcome Center is expected to be open in advance of the 2016-17 school year.

The five year timeline for projects can be viewed on our website, under [BOND UPDATES](#). If you have any questions, please contact the district office at (503) 981-2727. Thank you!
